Write numbers to a file using fprintf()

Start of transcript. Skip to the end.

PETRA: Now that you know how to read input from files, it is easy to learn how to write output to files. Suppose we wanted the user to enter student grades from the keyboard and then store these grades in a file.

Let's begin by remembering how we read a number from a file.

This is the program that we started with when we learned how to read from a file.

We declare a file pointer
