Problem statement	Hints	Submission	Solution
-------------------	-------	------------	----------

Code 1 x + ⓘ

```
1 #include <stdio.h>
2
3 int main(void) {
4     FILE *ifile;
5     int grade, newGrade;
6
7     scanf("%d", &newGrade);
8
9     ifile = fopen("myGrades.txt", "r");
10
11     while (fscanf(ifile, "%d", &grade) != EOF);
12     fclose(ifile);
13
14     if (grade!=newGrade) {
15         ifile = fopen("myGrades.txt", "a");
16         fprintf(ifile, " %d", newGrade);
17         fclose(ifile);
18     }
19     ifile = fopen("myGrades.txt", "r");
20     while (fscanf(ifile, "%d", &grade) != EOF){
21         printf("%d ", grade);
22     }
```
