Activity: read numbers from a file

 [Bookmark this page](#)

Taskgrader (External resource) (1.0 / 1.0 points)

Problem statement	Hints	Submission	Solution
<p>This task offers 3 hints :</p> <p>Hint 1 :</p> <p>Use a loop to read and sum the grades, then divide by the number of grades and output the correct average.</p> <p>Hint 2 :</p> <p>The first number in the file indicates how many grades are stored in the file, so this number itself is not a grade. Do not include it in your grade computation.</p> <p>Hint 3 :</p> <p>Remember that C will perform an integer division when both numbers in your division problem are integers. This means that you will need to cast at least one of them to a double.</p>
