☑ **I seem to not get the second test correct, please help**
Hello, I've been trying to solve the task for the last hour and haven't gotten the second test correct. I changed my code many times. Can you please help me? #include <stdi... **3**

💬 **Good one!**
Good one! **1**

💬 **Ok....** **3**

💬 **Difference between the example provided and actual Taskgrader output**
Hello, There is a difference between the provided examples and the Taskgrader output. Example: ---------- 95.23 94.80 91.56 96.40 93.25 99.64 ---------- Output: ---------- No 4 -... **5**

💬 **All is well**
Just passing by with a smile. Things are working! **1**

? **No questions**
thanks **1**

💬 **Activity setting seemed to be wrong with "Reading until the end of the file"**
My code passed the tests after re-submitting several times without modification. I gather there are several test data file used randomly, and only one seemed to have corre... **3**

💬 **Ack..**
I need to learn to read more carefully. I initially read the prompt wrong and wrote a program that figured out how many classes had a higher grade than your own and prin... **3**

? **code shows the same answer on taskgrader while it works fine on weblinux?**
it doesn't even enter the while loop for some reason so anser is always "Yes"... here is my code: #include <stdio.h> int main(void) { int num=0,i=0; double myAverage,n,max... **21**

💬 **Confidence**
I now feel confident about c programming **1**

💬 **Inconsistent results**
I had another solution that worked fine in Weblinux, even when "gradeComparison" had 12 values with the last one being 0.0000001 larger than the first grade, but failed i... **2**

☑ **Help with this output** **6**

💬 **Though probably not be expected code but want to fix warnings** **13**

? **Variable set but not used**
Hi, I'm getting a "variable set but not used" compilation warning and my code isn't running correctly as well. I'm unable to figure out what's wrong. Please help! #include <s... **7**
