Taskgrader (External resource) (0.5 / 1.0 points)

Problem statement   Hints   Submission   Solution

Code 1 ✕   +   🕓

```
 1   #include <stdio.h>
 2
 3   int main(void)
 4   {
 5       int n = 0;
 6       double grade, mygrade;
 7       int found = 0;
 8       char *filename = "gradeComparison.txt";
 9       double checkempty;
10       FILE *sections = fopen(filename, "r");
11
12       int data;
13       data = fscanf(sections, "%lf", &checkempty);
14       if (data == EOF)
15       {
16           printf("No data found!\n");
17           return 1;
18       }
19
20       while (fscanf(sections, "%lf", &grade) != EOF)
21       {
22           if (n == 0)
```

Submit answer
